

# MYODERM'S NEW GLOBAL HQ

Opening in 2021, our brand new global headquarters and US operational facility will be located on 14 acres in Horsham, Pennsylvania.

The 65,000-sq.-ft. cGMP facility will include shipping and receiving, controlled room temperature, refrigerated (2–8°C) and frozen (-20°C to -80°C) storage and monitoring. The facility also allows for future expansion of our warehouse to support the continued growth of Myoderm's current and future service lines.

## CLINICAL TRIAL DRUG STORAGE & DISTRIBUTION

Our new facility will offer the following storage conditions for your trial supply needs:

- Controlled Room Temperature
- Refrigerated (2–8°C) storage for up to 346 pallets
- Frozen (-20°C and -80°C) storage
- Secondary Labeling suite
- DEA vault for storage of scheduled drugs

## CONTROLLED SUBSTANCE STORAGE

The new facility will also be equipped to handle storage for controlled substances in the following conditions:

- Controlled Room Temperature
- Refrigerated (2–8°C)

## SECONDARY PACKAGING & LABELING

We can offer secondary packaging and labeling within the following conditions:

- Controlled Room Temperature drugs
- Refrigerated (2–8°C) drugs
- Frozen (-20°C and -70°C) drugs

## CLINICAL TRIAL EQUIPMENT & SUPPLIES STORAGE

- Dedicated storage space for clinical trial equipment and ancillary supplies
- Secured Ancillary return cage, cleaning and disinfecting and inspection area to process clinical trial equipment and ancillary supply returns
